**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:
  - I. Claims 1-5, 20-27, drawn to a transgenic cotton plant or seed, cells or tissue thereof comprising event EE-GH1 and a process of making same, classified in class 800, subclass 300, for example.
  - II. Claims 6-12, 18 and 19, drawn to a method of identifying a transgenic plant, or cells or tissue thereof comprising the elite event EE-GH1, classified in class 435, subclass 6, for example.
  - III. Claims 12-17, drawn to a kit for identifying elite event EE-GH1 in biological samples, classified in class 536, subclass 24.3, for example.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated because the method of identifying a transgenic plant of Group II and the kit for identifying elite event EE-GH1 of Group III cannot be used to make the transgenic cotton plant of Group I.
3. Inventions II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different

Art Unit: 1638

process of using that product (MPEP § 806.05(h)). In the instant case the kit for identifying elite event EE-GH1 of Group III could be used to identify any transgenic plant comprising a *bar* gene as claimed, and thus can be used in a materially different process than the method of identifying a transgenic plant of Group II.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, recognized divergent subject matter, and because the search required for one of the groups is not required for another, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete within one month (not less than 30 days) must include an election of the invention to be examined even though the requirement be traversed (37 CFR § 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David H. Kruse, Ph.D. whose telephone number is (703) 306-4539. The examiner can normally be reached on Monday to Friday from 8:00 a.m. to 4:30 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dr. Amy Nelson can be reached at (703) 306-3218. The fax telephone number for this Group is (703) 872-9306 Before Final or (703) 872-9307 After Final.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group Receptionist whose telephone number is (703) 308-0196.

A handwritten signature in black ink, appearing to read "Amy Nelson". The signature is fluid and cursive, with the first name "Amy" and last name "Nelson" clearly distinguishable.
